Millions of fault free parts

As one of the first companies we were already certified in 1993. Since 2003 we are certified to DIN EN ISO 9001:2000 and additionally since 2005 to ISO TS 16949.

- more than 200 employees
- most modern machines and equipment
- more than 12000 m² production area

Project planning Automation Production

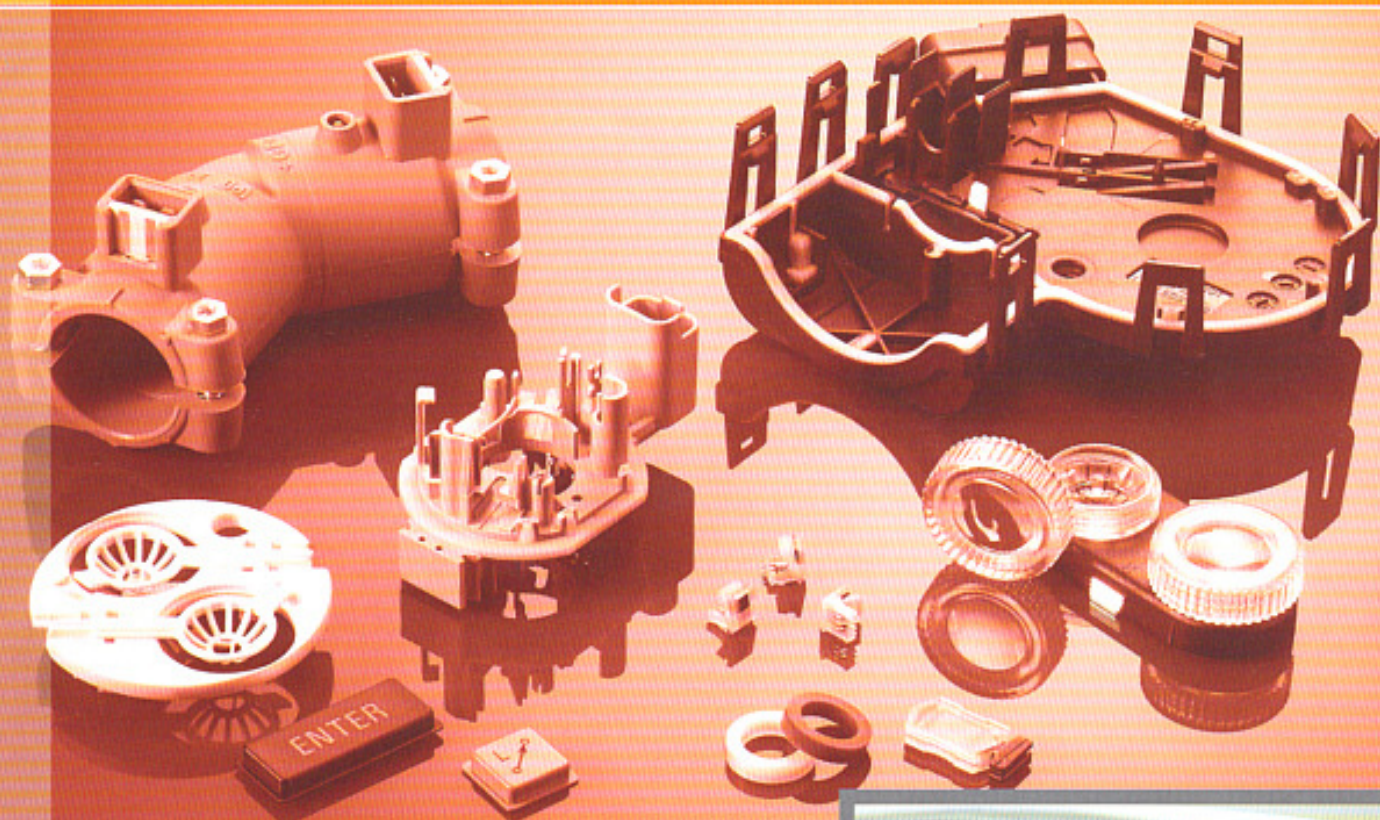

for various sectors such as

- Mechanical engineering
- Automotive industries
- Electrical and electronic industries
- Textile industries
- Medical and Dental Technologies
- Chemical and Pharmaceutical industries
- Food industries

our strengths:

- Multi components and colour injection moulding technology
- Insert moulding of metal and ceramic parts
- Automation in production and assembly

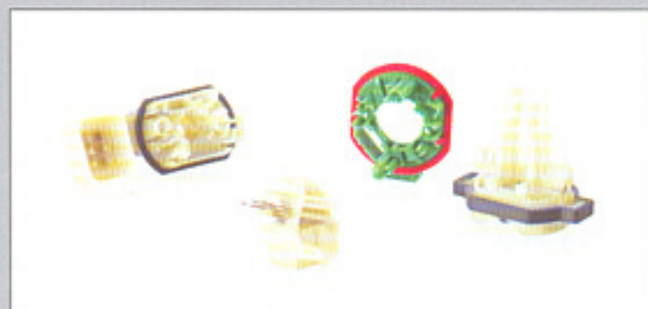

Planning Design Mould making Production
Plastic injection moulding

Decades of experience enables us to produce professionally the most sophisticated moulds and plastic parts.

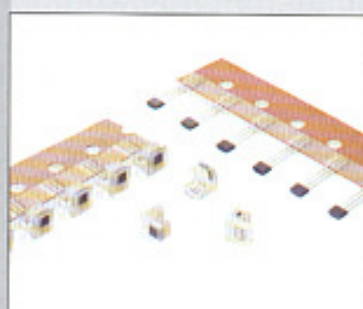

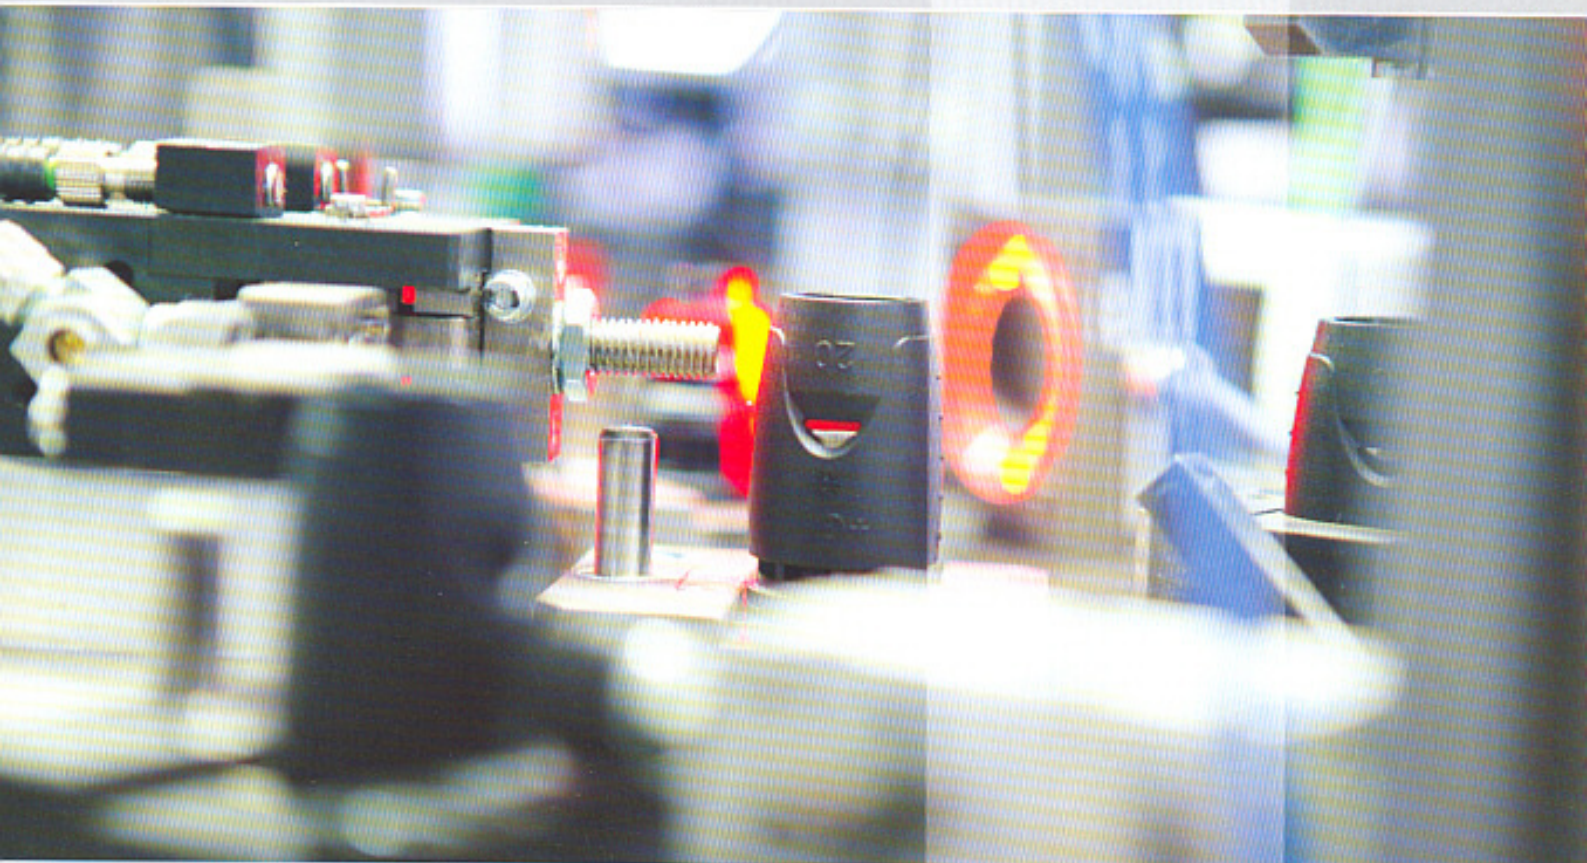

Computer networks and logistic systems guarantee individual on schedule order handling.

Plastic injection moulding

Automated production

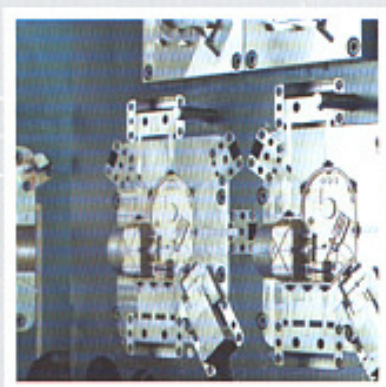

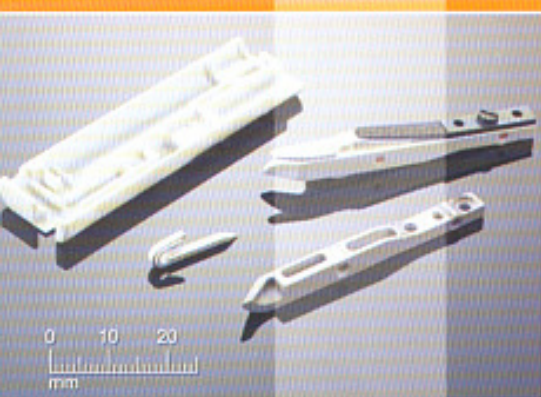

- Assembly
- Technical plastic parts
- Multi component parts using insert and outsert moulding
- insert moulding of integrated circuits

Ceramic injection moulding

World leadership is achieved
through our products made
of High Performance Ceramics
 Al_2O_3 and ZrO_2 .

stern
plastic

Advanced mould making
is the key to our
production capabilities.
